

Flexi Klick

PREVENTION. PROTECTION. PEACE OF MIND.

High Security Seal

ISO 17712 "H" Compliant
C-TPAT Compliant

Flexible High Security Bolt Seal

1. Laser engraved dual numbering on both pin and bush prevents parts substitution
2. Anti-spin feature protects against friction attacks.
3. Compared to a rigid steel bolt seal, the Flexi Klick is safer to cut, as the flexibility of the pin eliminates the ricochet or "bullet effect" created when most rigid steel bolt pins are cut by a bolt cutter.
4. The flexibility of the pin makes the Flexi Klick easy to apply on container- or trailer door latches that have been "bend out of shape" after years of (ab)use.
5. The extra long pin of the Flexi Klick makes this seal perfect for truck trailers with roll down door latches that require additional pin length.
6. Flexible pin made from galvanized wire, provides excellent protection against crude tools such as hammers, crow bars and steel pipes. On impact, the pin will bend, not break.
7. Pin and bush are joined together for easy handling.

Specifications

Product	Material	Pin Length	Bolt Diameter	Wire Diameter	Pull Strength	Marking Area	Max Marking Digits
Flexi Klick	ABS with High-Carbon steel pin and bush. Flexible Galvanized Steel Wire <i>"metal parts meet the ISO 17712 requirement of 18mm min diameter"</i>	92mm	11.90mm	5.0mm	1,300 kg	Pin : 5mm x 17mm Barrel : 16mm x 27mm	8
Carton Quantity	Dimensions	Weight kg/carton	Volume m³/carton	Standard Colours			
250pcs	400mm x 290mm x 225mm	15.75kgs	0.0261	Blue, Green, Light Green, Red, Light Red, Orange, yellow, White.			

Flexible High Security Bolt Seal

Because the pin of the Flexi Klick is made from soft galvanized wire, the cut-off parts of the seal, will not puncture truck tires. If a truck will drive over the cut-off pin parts, the wire of the bolt pin will fray, and not penetrate the truck tire. This feature brings cost savings to any company that is maintaining a truck fleet or operating a cargo terminal.

Compared to rigid steel bolt seals, the Flexi Klick is easier to cut, when using a standard bolt cutter. Therefore this C-TPAT compliant bolt seal is the perfect security seal for any organization challenged with removing or applying larger volumes of security seals on a daily basis.

Be assured of better security with our innovative use of materials and industrial design.
